Additional modules includes Dose/Response, Paired T-test, Chi-square and Fisher's test, Correction, Survival and regression analysis, jamovi - a new "3rd generation" statistical spreadsheet based on R It has a very nice user interface making is easy to create or load and edit data including computed variables and apply statistical analysis. For now there is only a few functions available compared to R's great many packages, but the setup makes it relatively easy for skilled users to add new functions. Thus it's expected that more functions will be available from the online library in the near future. New modules on meta-analysis, mixed linear effects models, general linear models, robust statistics been added recently. It's contributed to the scientific community by the people behind JASP.It's free and opensource, Jamovi is available for download for Windows (Vista and above), macOS (Mavericks and above) and Ubuntu (Xenial and Yakkety). JASP - is described by the authors as a "low-fat alternative to SPSS", and "Bayesian statistics made accessible". Provides a user-friendly interface to many of the commonly-used statistical analyses -- descriptive statistics, plots, t tests, Levene&AAAs Test, ANOVA, ANCOVA, contingency tables, Pearson and Spearman correlation, Kendall&AAAs Tau-B, and linear regression. For many of these analyses, the JASP also provides& the closest corresponding Bayesian equivalent, implemented in a way that will be understandable to people not familiar with Bayesian concepts and terminology. Windows only. KyPlot -- is a Windows application and offers you an integrated environment for data analysis and visualization. There is two types of windows: "Spread" and "Figure". A "Spread" window contains Excel-like spreadsheets, supporting calculation with cell formulae. It provides a wide range of computing methods such as mathematical optimization, spectral, time-series Wavelet analysis. the program also offers a variety of statistical procedures, including parametric and non-parametric tests and multivariate analysis. in a figure window, you can create graphics and draw schemas and present them as a slideshow. microsrir - a comprehensive statistical management and data management package for windows, derived from the osiris iv package developed at michigan university, was developed for serious research analysis oando moderate to large data sets. main features: handles any data size; has excel data input; imports/exports spss, sas and datasets of statistics; reads kpsr (osiris) and unesco data sets (dams.) data mining techniques for market analysis (research -very fast for large data sets.) interactive decision tree to select appropriate tests; database manipulation (dictionaries, sorting, merging, extensive checking stauincerar the fully functional version is free; the authors would appreciate a small donation to support continuous development and distribution. openstat - is a general statistics package for all versions of windows (including win 7 and win 8) and for linux (under wine.) systems developed by bill miller, iowa state u, with a wide range of data manipulation and analysis features a spss. bill type orary interface also provided an excellent orary manual as an adobe acrobat file. Besides, there is aFree Pascal, manual, sample data and source code for lazstats, which contains programs similar to OpenStat. Bill Miller closed maintenance and development. The software is available for your convenience, as it is farther awayPSPP - A free replacement for SPSS (although at this time it implements only a small fraction of SPSS analyses). But it's free and never "expirará". It replicates SPSS's "appearance and feel" closely and even reads the syntax and native SPSS files! Some other features ... support more than 1 billion cases and more than 1 billion variables. Choose from the terminal or graphic user interface; Choose from text, PostScript or HTML output formats. Intero-opera com Gnumeric, OpenOffice.org and other free software. Easy import of data from spreadsheets, text files and database sources. Rapid statistical procedures, even in very large data sets. No licence fees; no validity period; No antitheical user license agreements "En. User manual fully indexed. Cross platform; Runs on many different computers and many different operating systems. SOFA (Statistics open for all) - An innovative programme of statistics, analysis and report. Available for Windows, Mac and Linux systems. It has an emphasis on ease of use, learn as it progresses and in the beautiful exit. Check the resource list. SALSTAT-2: A statistical system of various platforms and easy to use that provides data management (importation, editing, pivot tables), statistical calculations (descriptive inputs, probability functions, chi-square, T tests, 1 ANOVA passage, regression, correlation, non-parametric tests, six-sigma) and graphics (bar, line, dispersion, area, histogram, box and mustache, have adaptive control. Last updated in 2013. View - A visual statistics program for Win3.1. Win 95/NT, Mac and Unix, with a structured work area, with features designed to structure and help the statistical analyst. Last UpdatedOpenepi-OPENEPI is a sign of programs of Public and Open Code Codic and Medicine, providing vain epidemiological and statistical tools. Verst 2 2 It has a new interface that features results without using pop-up windows and has better installation methods so it can run without an Internet connection. Version 2.2 (2007/11/09) allows users to run the software in English, French, Spanish or Italian. Last updated in 2013. Statist - a compact and portable program that provides more basic statistical resources: data manipulation (recording, transformation, selection), descriptive statistics (including histograms, box and mustache graphics), correlation and regression and common significance tests (chi-square, t test, etc.). Written in C (source available); Runs on Unix/Linux, Windows, Mac, among others. Last updated in 2006. Tanagra-a free data mining package (open source) that supports the standard "flow" paradigm used by most data mining systems. It contains components for data source (tab-limited text), visualization (grade, dispersion charts), descriptive statistics (interlacing, ANOVA, correlation), instance selection (sampling, stratification), selection and resource construction, regression (lineal multiple), factor analysis (main components, cluster multiple correspondence). Last updated in 2013. DAP-A package of statistics and graphs developed by Susan Bassein for Unix and Linux Systems, with management, analysis and common graphics (correlations and regression, ANOVA, categorical data analysis, logistic regression and non-parametric analysis). Provides part of the main functionality of SASIt is able to read and execute many (but not all) sas programs files. DAP is freely distributed under a gnu gnu style Last updated in 2014. It is not clear if it is available on Windows. DataPlot-(Unix, Linux, PC-DOS, Windows) for scientific visualization, statistical analysis and nonlinear modeling. It has extensive mathematical and graphic resources. Integrated into the Engineering Statistics Manual of NIST/Sematech. Winks (Windows KwikStat)- A package of statistics of easy use and complete use with statistics (means, standard deviations, medians, etc.), histograms, t tests, correlation, chi-square, regression, non-parametry, variance analysis (ANOVA), probability, QC charts, CPK, charts, life tables, temporal series, crosstabs and more. Works on Windows XP (as well as Windows 2000, NT, 98, Me and 95.) comes in basic and professional editions. Evaluation version available for download. Last Updated 2015 SISA - Simple interactive statistical analysis of Daan Uitenbroek. An excellent collection of individual window and DOS modules for various statistical calculations, including some analyses that are not readily available elsewhere. Some examples are: Distributions - Analysis of discrete distributions of a single dimension. Tables - Table analysis with cells up to 2\*7 and 3\*3. Also, check R, described in the Programming Languages section below. SAS on demand - SAS Studio. Anyone can sign up to access this Web-based version of SAS. You need to save any data file on the SAS server (it is not possible to access local files) and there is a 5 gig limit. CIMA Data Exploration Software, especially suitable for multivariate data analysis (visualizing up to 13 variables simultaneously using 3D models). Commercial, but free for up to 250 records. Develve - Statistics package for a quick and easy interpretation of experimental data in science and research and development in a technical environment. Everything .ecerapa .ecerapa roiam ofAsrev amu .sodacilc odnauc .eáá siev;Alor etnemlicaf oEAs socif;Árg so .olpmexe roP ;soluucu sunem mes .siev;Asiv etnematerid oEAs sodatluser so e lev;Asseca For group comparisons, they directly indicate the meaning of the difference in the mean and variation and if the sample size is sufficiently large. It has a basic mode for statistical tests and a way of designing experiences. Explorer-A program of exploration/graphic/data analysis with a very elegant drag and drop interface. Accepts data from text files, Excel worksheet, MySQL databases, and copy/paste in the transfer area. Provides more than a dozen types of plots and diagrams, basic statistical summaries, significance tests (qui-square, t, ANOVA) and more advanced analyses (factory, main components, discriminating, variation, linear regression). You can download executable programs for Windows and Mac OSX. Written in JavaScript, so it can also be run in any modern browser. Statext-provides a good variety of basic statistical tests, with text output (and text-based graphics). Features include: rearrange, transpose, tabular and count data; random sample; basic descriptive; text charts for points, boxes and nurses, stem and leaves, histogram, scattering chart. Find z values, confidence interval for means, t tests (one and two groups and paired). Anova of one and two ways; Pearson, Spearman and Kendall Correlation; Regression linear, chi-square quality test and independence tests; signal test, Mann-Whitney tests U and Kruskal-Wallis H, probability tables (z, t, chi-square, f, u); random number generator; central limit theorem, chi-square distribution. The site says "The Statext is built in the .NET structure, needs .NET Framework 2.0 or later. If you do not have the .NET structure on your computer system, Statext does not work." Past-a easy-to-use data package targeted in paleontology, including a .odardauq-uu .odardauq-uuq od oEÁšAatunrep ed setset .t oEÁšAatunrep .t ,(f aicn&Acifngis ed setset .avruc ed etsuja .socif;Árg ,ahlinalp opit od sodad ed adartne ed oir;Álumrof mu :megalefom e megatolp ,acits&Atatse ed snumoc sep;ÁšAnuf ed oEÁšAeles Mann-Whitney, Shapiro-Wilk, Rho and Kendall of Spearman Tau tests, correlation, covariance, contingency tables, one-way ANOVA test, Kruskal-Wallis test,) indices and profiles of diversity and similarity, abundance model adjustment, multivariate statistics, time series analysis, geometric analysis, parsimonia analysis and biocysmography (cladistica. AM - a free package to analyze data from complex samples, especially large-scale evaluations, as well as research data without evaluation. It has sophisticated statistics, easy to drag and drop interface and integrated help system that explains the statistics as well as how to use the system. You can estimate models through the marginal maximum probability (MML), which defines a probability distribution over the proficiency scale. It also analyses "plausible values" used in programs such as NAEP. Automatically provides appropriate standard errors for complex samples via Taylor series approximation, jackknife & other replication techniques. Also, check OX, described in the Programming Languages section below. Data Desk - first released in 1986, is one of the programs Mac older still actively developed. Modern versions (for Mac OS X and Windows computers) are available for a 30-day track. Statistics Manually - a Android Mobile App. This application contains a large collection of common statistical method formulas in the social sciences as well as the statistical tables needed to interpret your test results. These tables not only cover the standard z, t, chi2, F, and binomial distribution, but exact values for the Hartley Fmax test, the Mann-Whitney-U test and Wilcoxon test signed. You will also find the formulas of these tests. MaxStat - statistics and graphics programs (for Windows.) Easy to use, modern interface. Specifanlysis in three simple steps within a single dialog box. Two versions are available: \* Lite (free) has descriptive statistics, hypotheses tests (t-tests, (t-tests, sodad ed socnab ,shalinalp ,otxet ed soviurga ed sodad atropml .socif;Árg me sodaesab e rednetne ed siec;Áf sodatluser azitafne ,socis;Áb socits&Atatse setset so sodot eecenrof ,)hsotimicaM arap sanepa (- draziW .otutary daolnwod arap lev;Ánopsid iÁtse said 03 ed oEÁšAailava ed oEÁšrev amU .cte .sohnimac ed esil;Ána ,edadiiaQ ed esil;Ána ,atnujoc esil;Ána ,lanoisnemiditlUM oEÁšAalacsE ,aicn&AdnopserrroC ed esil;Ána ,oEÁssereR e oEÁšAcifissalC ed serovrÁ ,retsulC ed esil;Ána ,etseT ed metl ed esil;Ána ,siaicapsE sacits&AtatsE ,atsoseR ed seicÁfrepuS ed oEÁšAazimitO ,aicn&AviverboS ed esil;Ána ,opmeT ed eir©ÁS eecenroF .zirtam ed soluc;Ác ratucexe :sodad a sol-;Átsuja e sep;ÁšAibirtsid satium me edadililaborp ed soluc;Ác rezaf ,aigrene ed esil;Ána razilaer ,sotnemirepxe ratejorp ;sardauc sonem ed laicrap oEÁsserger a raluclac ;alpit\*Am oEÁsserger ed lanoicnevnoC esil;Ána arap sodauqeda oEÁs oEÁn sodad sues odnauc atsubor ofAsserger ed esil;Ána ed sopit setnereref razilaer ;sotim seraeñil e siareg seraeñil ,seraeñil soledom me sodaesab
